Lithos 48 (1999) vii

LITHOS

Contents

Special Issue: Composition, Deep Structure and Evolution of Continents
Harvard University, Cambridge, Mass., 15–17 October 1997

Preface ix
Seismic imaging of lithospheric discontinuities and continental evolution
M.G. Bostock 1
The deep structure of the Australian continent from surface wave tomography
F.J. Simons, A. Zielhuis and R.D. van der Hilst 17
Velocity structure of the continental upper mantle: evidence from southern Africa
K. Priestley 45
Imaging the continental upper mantle using electromagnetic methods
A.G. Jones 57
Heat flow and the structure of Precambrian lithosphere
A.A. Nyblade 81
The thermal structure and thickness of continental roots
C. Jaupart and J.C. Mareschal 93
Stability and dynamics of the continental tectosphere
S.S. Shapiro, B.H. Hager and T.H. Jordan 115
The continental tectosphere and Earth's long-wavelength gravity field
S.S. Shapiro, B.H. Hager and T.H. Jordan 135
The evolution of continental roots in numerical thermo-chemical mantle convection models including differentiation by partial melting
J.H. de Smet, A.P. van den Berg and N.J. Vlaar 153
The age of continental roots
D.G. Pearson 171
Nature of the mantle roots beneath the North American craton: mantle xenolith evidence from Somerset Island kimberlites
S.S. Schmidberger and D. Francis 195
Evidence from mantle xenoliths for relatively thin (< 100 km) continental lithosphere below the Phanerozoic crust of southernmost South America
C.R. Stern, R. Kilian, B. Olker, E.H. Hauri and T.K. Kyser 217
Erosion of lithospheric mantle beneath the East African Rift system: geochemical evidence from the Kivu volcanic province
T. Furman and D. Graham 237
Trace element compositions of minerals in garnet and spinel peridotite xenoliths from the Vitim volcanic field, Transbaikalia, eastern Siberia
S.M. Glaser, S.F. Foley and D. Günther 263
Growth of subcontinental lithosphere: evidence from repeated dike injections in the Balmuccia lherzolite massif, Italian Alps
S.B. Mukasa and J.W. Shervais 287
Evidence for Archean ocean crust with low high field strength element signature from diamondiferous eclogite xenoliths
D.E. Jacob and S.F. Foley 317
